

Dice per organ at each architecture step

4-fold cross-validation × 3 seeds, 40 patients

Baselines → U-Net

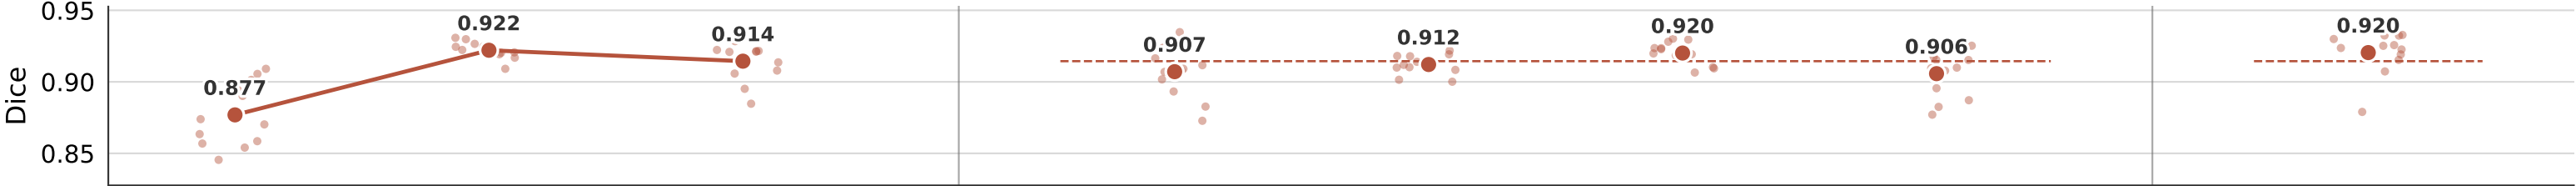

U-Net + one change

Combination

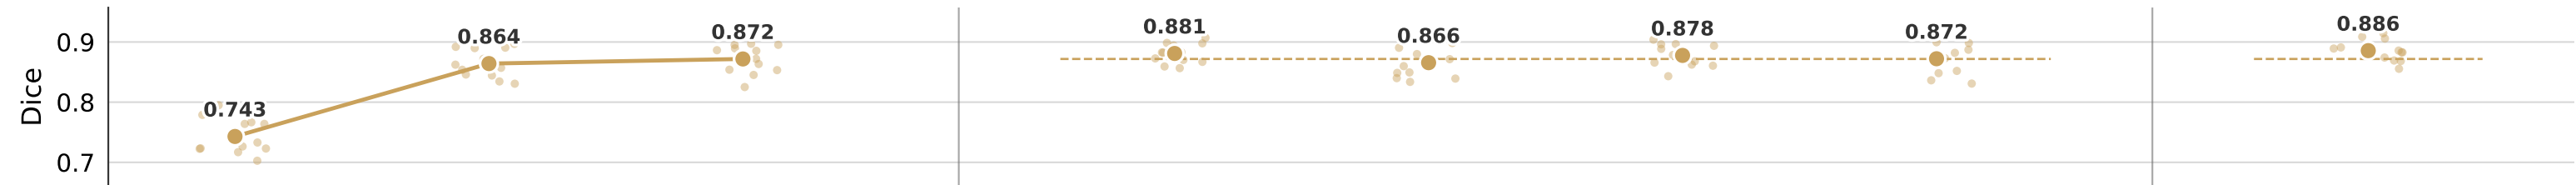

Esophagus

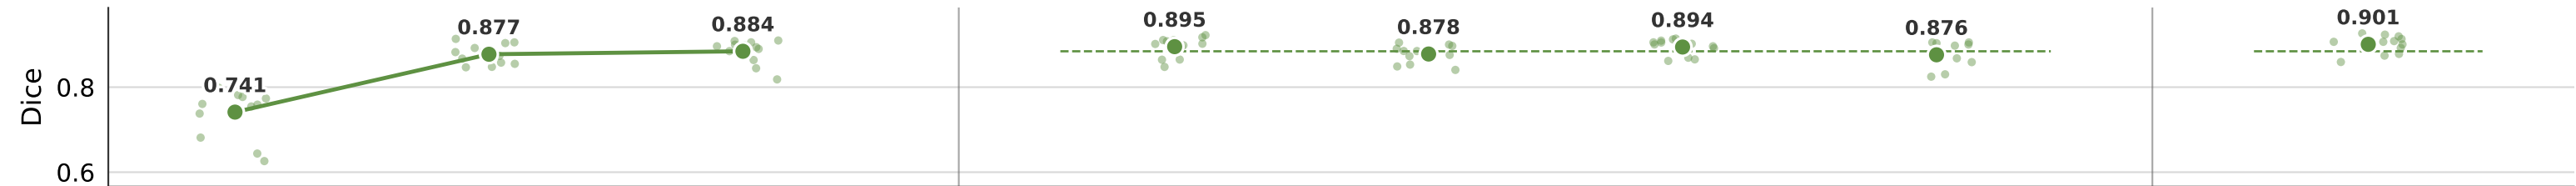

Heart

Trachea

Aorta

All organs (mean)

• run (4 folds × 3 seeds) —●— mean of the 12 runs - - - - mean of U-Net

Dice, 3D on the original CT grid, best checkpoint; each run's value is the mean over the patients of its validation fold. All organs = mean of the 4 organs per run. Y-axes differ per organ.
