Patient 01: ENet 2.5D Inputs After Pre-processing

Mean over the four organs (CV, 3 seeds) - 3-slice: Dice 0.898, HD95 5.9 mm, ASSD 1.35 mm | 5-slice: Dice 0.892, HD95 5.9 mm, ASSD 1.33 mm. One row per organ at its largest ground-truth slice. Slices resampled to 2.5 mm apart, so the 5-slice input spans ±5 mm.

Validation PNGs of fold 0 (data/sliced_12749947): median-spacing resample (0.977 x 0.977 x 2.5 mm), fold HU window -982 to 270 mapped to 0..255, ROI crop/pad to 288x288; the network also z-scores (mean 17, std 177 HU). Display crop differs per organ.
