Patient 40: All 93 Slices With Esophagus

Pre-processed slices (inferior to superior, left to right, then down), 2.5 mm apart, so the esophagus spans 230 mm. Each panel is the centre of one 2.5D sample; outlines are the ground truth of all organs.

Validation PNGs of fold 1 (data/sliced_d27e8eea): median-spacing resample, HU window rescaled to 0..255, ROI crop/pad. One shared crop for all panels. Axial view, anterior up, patient left on the right.
