Patient 40: ENet 2.5D Inputs After Pre-processing

Mean over the four organs (CV, 3 seeds) - 3-slice: Dice 0.903, HD95 5.7 mm, ASSD 1.30 mm | 5-slice: Dice 0.896, HD95 6.4 mm, ASSD 1.78 mm. One row per organ at its largest ground-truth slice. Slices resampled to 2.5 mm apart, so the 5-slice input spans ±5 mm.

Validation PNGs of fold 1 (data/sliced_d27e8eea): median-spacing resample (0.977 x 0.977 x 2.5 mm), fold HU window -982 to 274 mapped to 0..255, ROI crop/pad to 320x320; the network also z-scores (mean 24, std 181 HU). Display crop differs per organ.
